

Vulnerability Assessment

World-class Protection for your Connected Business

Peace of mind

In today's connected world, medium-sized businesses are prized targets for hackers and easy marks for ransomware attacks.

Now, more than ever, you need to protect your organization from security breaches by identifying possible weaknesses in your network and web applications.

The *CloudPro Vulnerability Assessment* identifies areas where a compromise would have the greatest impact and risk to your business.

CloudPro's Vulnerability Assessment helps you:

- Understand your current security threats stay ahead of cyber criminals
- Assesses your environment
- Identifies gaps and dependencies
- Analyzes your security risks

Our proven methodology provides a comprehensive, understanding of your company's network and web application vulnerabilities

Gain the upper hand against cyber criminals

Your trusted partner

Our security experts recommend strategies and approaches to address the unique vulnerability issues of your business and help you achieve your strategic security goals.

Give your customers and business partners the piece of mind by having one of our security experts assess your environment today.

What We Offer

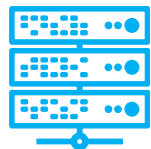

Web Application Vulnerability Assessment

Web application vulnerability testing uses state of the art tools and best practices to identify a web application's vulnerabilities in areas such as input validation, coding practices, configuration management and authentication.

CloudPro security engineers assess your web application to classify and prioritize vulnerabilities and their potential impact on your business.

- Identify and address your web application security vulnerabilities
- Increase the security level of your web application
- Comprehensive report with report and next steps
- Identify and mitigate vulnerabilities and misconfigurations that could lead to a future compromise of your IT infrastructure

Network Application Vulnerability Assessment

CloudPro's Network Vulnerability Assessment identifies, classifies and prioritizes your network infrastructure vulnerabilities and provides you with the knowledge and guidance to remediate your security issues.

CloudPro provides you with a comprehensive network vulnerability assessment report that identifies potential vulnerabilities while reducing the number of false positives.

- Analyze current level of security and rank vulnerabilities by threat level
- Determine a quantifiable threat or risk for each vulnerability
- Identify vulnerabilities before a breach occurs to stay one step ahead of attackers
- Mitigate the causes of vulnerabilities

Key Benefits

- Current and state-of-the-art security tools and best practices
- Identify potential and actual vulnerabilities
- Comprehensive security assessment technical report
- Executive summary report that highlights key vulnerabilities
- Consultation with security experts to review results and recommendations
