

FULLY MANAGED BACKUP FOR ALL CLOUDS

Assured Data Protection (Assured) is a global data backup and disaster recovery managed service provider. As Rubrik's largest and most established MSP, Assured operationalizes Rubrik's Zero Trust Security solutions, delivering data security and protection to customers in over 50 countries worldwide.

Assured's dedicated team provides 24/7/365 support to ensure customers can protect, detect and recover critical data and operations with minimal downtime.

Assured's managed service solutions, built on Rubrik's Security Cloud, enable organizations to control their entire backup environment ensuring resiliency against data loss, natural disasters and cyber attacks.

CLOUD NATIVE PROTECTION

Full support for Azure, AWS and GCP virtual workloads enabling a single pane of glass for your chosen cloud infrastructure providers.

IAAS PROTECTION

Secure application specific workloads running on any cloud IaaS platform including MSSQL, Oracle, SAP, files and any other generic applications or databases.

PAAS PROTECTION

Rubrik can interact with Azure SQL managed instances and databases, AWS RDS MySQL Aurora, Oracle, SQL server and Postgres databases.

DEFEND AGAINST RANSOMWARE	Ensure cyber resiliency with immutable and logically air-gapped data, end-to-end encryption and granular role-based access controls to ensure data cannot be accessed, deleted or encrypted by ransomware.
RECOVERY FROM RANSOMWARE	Access ransomware impact and attach blast radius and sensitive data discovery. Triage recovery operations rapidly with an automated recovery playbook and clean application sequencing order.
APPLICATION RECOVERY	Recover virtual machines on-demand in the event of data center contingencies. Enable self-service for application test/dev cloud sandboxes.
DATA ARCHIVAL	Cost-effectively archive enterprise data estates for secure, durable, long-term retention, whilst having immediate access with real-time predictive search.
RUBRIK CLOUD VAULT	A fully managed service which delivers Rubrik Zero Trust Security for account-isolated cloud archiving. Ensure that a pristine copy of protected data exists outside your hybrid IT environment.
CLOUD-NATIVE PROTECTION	Automate backup and recovery of VMs, files and Microsoft 365. Protect cloud-native applications (such as Windows or Linux and SQL databases) integrated with cloud storage.
MICROSOFT 365 PROTECTION	Safeguard from data loss and accidental deletions. Eliminate ransomware risks with policy-based, fast, intuitive search and restore operations for Exchange Online, OneDrive, SharePoint and Teams.
