

ENSURE RESILIENCY AGAINST CYBER THREATS

Assured Data Protection (Assured) is a global data backup and disaster recovery managed service provider. As Rubrik's largest and most established MSP, Assured operationalize Rubrik's Zero Trust Security solutions, delivering data security and protection to customers in over 50 countries worldwide.

Assured's dedicated team provides 24/7/365 support to ensure customers can protect, detect and recover critical data and operations with minimal downtime.

Assured's managed service solutions, built on Rubrik's Security Cloud, enable organizations to control their entire backup environment ensuring resiliency against data loss, natural disasters and cyber attacks.

PROTECT YOUR DATA

Assured's managed services protect and secure your backup data in an immutable format, whether on site, off site or in the cloud.

DETECT ANOMALIES

Incorporating Rubrik's use of Machine Learning and AI, Assured's solution detects anomalies, large data changes or suspicious behaviour in your backup environment.

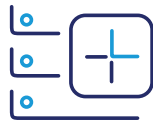

RECOVER OPERATIONS

Recover from ransomware and other cyber attacks, on-premises or in the cloud, from your immutable backups with near-zero RPOs & RTOs.

MANAGED BACKUP

Backup, archive and recover data on-premises or in your cloud environment.

OFF-SITE REPLICATION

Replicate critical data to a secure, off-site location to keep operations running.

DISASTER RECOVERY

Recover all your critical IT systems in minutes and hours, not days or weeks.

THREAT DETECTION

Monitor business critical data to prevent data loss and cyber attacks.

MANAGED BACKUP

Backup as a Service is an enterprise-grade backup, recovery and archive solution, purpose-built to protect organizations of all sizes, across single or multiple locations in private, public and hybrid cloud environments.

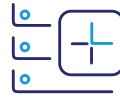

Assured provides Rubrik as a fully managed service including all hardware, software and support, tailored to meet your technical and commercial requirements.

DISASTER RECOVERY

Disaster Recovery as a Service ensures near-zero recovery times in the event of a significant IT failure. Leverage Assured's DR platform, removing the need for a secondary data center.

Assured's RecoverView platform enables orchestration and automation of recovery testing and live invocation. This includes a fully-documented audit and compliance report.

OFF-SITE REPLICATION

Replication as a Service provides an up-to-date copy of your backup data in a secure, air-gapped location. Choose one of Assured's off-site facilities or an alternative location.

In the event of production data loss, this gives you the capability to recover quickly from any point in time, to your chosen location.

THREAT DETECTION

Threat Detection as a Service identifies anomalies and accelerates the recovery process to minimize business impact in the event of a ransomware or cyber attack.

Automatically detect anomalies in your backup data, without impacting production performance. Pinpoint where the attack happened and recover quickly back to a clean point in time.
